Driving Sustainability with JD Edwards: A Practical Framework Discover how JD Edwards can support your organization's sustainability journey through an ESG (Environmental, Social, and Governance) framework. This session highlights strategies for tracking resource use, streamlining compliance, and leveraging data to drive efficiency. Learn how to align business performance with sustainability initiatives to create long-term value. **Jan Bengtsson** & **Patrick Pettersson**, Application Specialists at xperitus	**Finally, we're all on the same (E1) page** User cases showing the basics and the latest of E1 composed pages. (Don't worry, we'll show some widgets and orchestrations stuff too!) **Emma Peterson** & **Mikael Andersson**, Application Specialists at xperitus	**AI Analytics for JDE – How to generate value for your organization** Using AI in your organization is key to remain relevant in today's world. However, it often remains unclear how exactly AI can be leveraged to create value. In this talk we will present a structured approach to capture AI value, including the required prerequisites (JDE specific and other technical prerequisites) and specific use cases (short demo). **Daniel Smith**, Business Development and Delivery Manager at Cadran Analytics **Pim Dröge**, Data Scientist at Cadran Analytics	**Modernising JDE, A Practical Approach** A practical look at how the latest innovations can add value to your business. Following on from Mark's presentation of the latest roadmap and release updates, Christian will drill down into the detail and take a case-study approach to see the next steps in modernising JDE. Among the topics will be low-code extensions, seamless cloud integrations, intelligent AI, process enhancements, leveraging JDE native capabilities, modular cloud architecture, OCI best practices and True HA for JD Edwards. **Christian Fronteras**, CTO – Cloud at Redfaire **Mark Herwege**, Master Principal Solution Engineer JDE at Oracle

	Enterprise Process Modeler Optimize your business with JD Edwards Enterprise Process Modeler! Locate issues and spot opportunities with one of the latest tools. During this session we will go through the basics and dive into use cases. **Emma Peterson** & **Helena Nilsson**, Application Specialists at xperitus	**Logic Extensions – Get the Most Out of Your Orchestrations with LEX in Release 25** LEX (Logic Extensions) has been with us for a while, but are we really taking full advantage of all its features? In this session, we will present LEX in both its basic form and its more advanced capabilities. We will also showcase the advantages of using it compared to the traditional way of creating orchestrations. **Sebastian Lidberg** & **Mikael Andersson**, Application Specialists at xperitus	**A JD Edwards Success Story** Listen to one of the most successful JDE-customers. How to use JDE to produce sustainable products globally. **Martin G.P. Verheem**, Account Executive JD Edwards Benelux and Nordics **Anders Ottosson**, Sales Manager JD Edwards at xperitus

	Shaping the Future of Tax Compliance: Key Pillars Including ViDA, CTC, E-Invoicing, and SAF-T An overview of key pillars shaping the future of tax compliance: the EU's VAT in the Digital Age (ViDA) initiative, Continuous Transaction Controls (CTC), Electronic Invoicing (E-Invoicing), and the Standard Audit File for Tax (SAF-T). Participants will learn how these frameworks interconnect, their respective regulatory drivers, and their impact on business processes with real-world examples. **Evelina Fransson**, Senior Manager/ indirect Tax, Tax Deloitte AB, **Sofia Persson** & **Fredrik Magnfält**, Application Specialists at xperitus	**Do I have any notifications to act on? Are there any tasks I need to act on?** Message Center: A centralized hub for managing system notifications, workflow alerts, and approvals in real time. Who wouldn't want that? My Tasks: A personalized workspace that provides a real-time, organized list of my pending approvals, workflow actions, and assigned responsibilities in one place. Who wouldn't want that? **Henric Niklasson**, Application Specialist at xperitus	**On Tech – Orchestrator** This session will briefly show how an orchestration can be created that interacts with OCI AI Services, and how such an orchestration can be called from outside JDE. **Mark Herwege** & **Bart Vanden Abeele**, Master Principal Solution Engineers JDE at Oracle	**Our implementation/ upgrade, lessons learned** Peers to discuss their experiences. What went well? Where did we go wrong? Learn from the ones that have done the journey. **Anders Ottosson**, Sales Manager JD Edwards at xperitus **Per Björnskiöld**, CEO xperitus

	Oracle OCI AI and the JD Edwards Orchestrator Oracle OCI Artificial Intelligence and the JD Edwards Orchestrator will empower you to transform the way you do business. This session will talk about the art of the possible and provide some real life examples of what this can mean to you. **Mark Herwege** & **Bart Vanden Abeele**, Master Principal Solution Engineers JDE at Oracle	**We all love watchlist, right? What could possibly be even more cool and better? – Wait until you have seen: Widgets!** If you like watchlist and Cafe1, you will love Widgets. This is the new and coolest enhancement for even more simplified visual user experience. It does not stop with watchlist based on a query that is returning the counted rows in a badge or a flag. What if that counted number comes from an orchestration? Or what if that number is not a number, rather a textbox? What about the visualization itself, what if it can be something other than just a badge, say a chart of some kind. Welcome to join us in this session where we show you the new enhancement: Widgets! **Anna Runesson** & **Anders Winström**, Application Specialists at xperitus	**Understanding Stateful Orchestrations in JD Edwards: Enhancing Multi-Step Business Processes** An introduction to how stateful orchestrations work in the JD Edwards Orchestrator and why they are important for processes that require context across multiple steps. The session covers the difference between stateless and stateful orchestrations, how session data is stored, and scenarios where the technology delivers business value – such as multi-step validations and user interactions. **Sofia Persson** & **Fredrik Magnfält**, Application Specialists at xperitus
15.00-15.45	**Q&A with the xperitus xpert Panel** Join us for an engaging Q&A session with the xperitus xpert Panel. You can submit your question by simply scanning the QR code. Please be sure to send in your question before 2:00 PM on the day of the conference to secure your chance to win a great prize. The panel will cover a wide range of topics, and the discussion promises to be both insightful and inspiring. Conference room Freddy Fine		
15:45-16:15	**Coffee Break** (Conference Lobby, 4:th Floor)		
16.15-17.00	**Shaping the Future: Strategy Insights and Release 26 Roadmap** Join Jon Green and Paolo Moroni for a dynamic joint session, streamed live from Denver, USA. This session will recap key takeaways from INFOCUS, outline Oracle's evolving product strategy, and provide a detailed look at what's ahead with Release 26. You'll also get a preview of upcoming AU Days and learn how these initiatives fit into the broader vision. Don't miss this opportunity to gain firsthand insights into the direction we're heading and how it will empower your success. **Jon Green**, Senior Director, JD Edwards Product Management **Paolo Moroni**, Product Strategy Director, JD Edwards, Oracle Conference room Freddy Fine		
17:00-17:15	**Summary** **Per Björnskiöld**, CEO xperitus Conference room Freddy Fine
