- + What to do next?
- + Our experience

# JD EDWARDS NORDIC CONFERENCE 2025

---

September 30, 2025

---

## ViDA and the three pillars

# VAT in the Digital Age

The issues to be solved

## Pillar I

### Digital reporting requirements

Reporting is not digitalized, and Member States are introducing varying DRRs in an uncoordinated manner

## Pillar II

### Platform economy

Traditional and digital businesses are not treated equally

## Pillar III

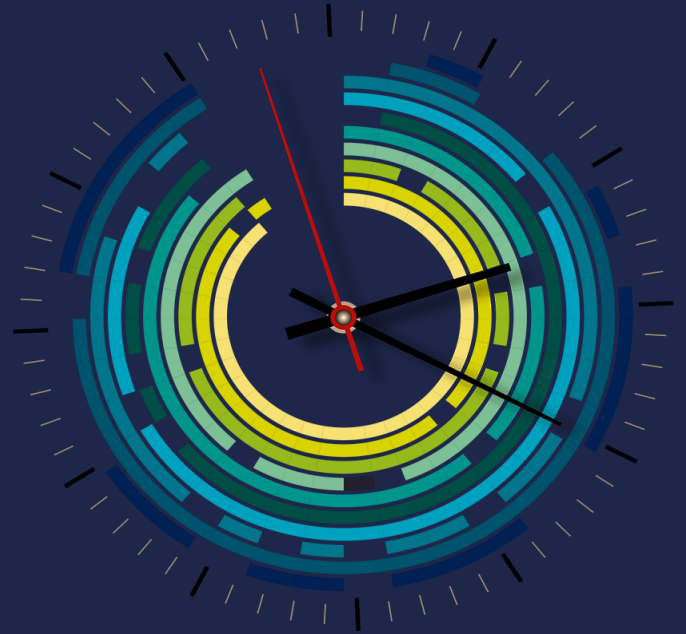

### Single VAT registration

Number of instances where businesses need to register in more than one Member State can still be reduced.

# Pillar I

## Digital Reporting Requirements

- + Mandatory e-invoicing for all B2B cross-border transactions within EU (10 days from taxable event)
- + Transmission of invoice data to the authorities (seller and buyer)
- + Removal of European Sales List

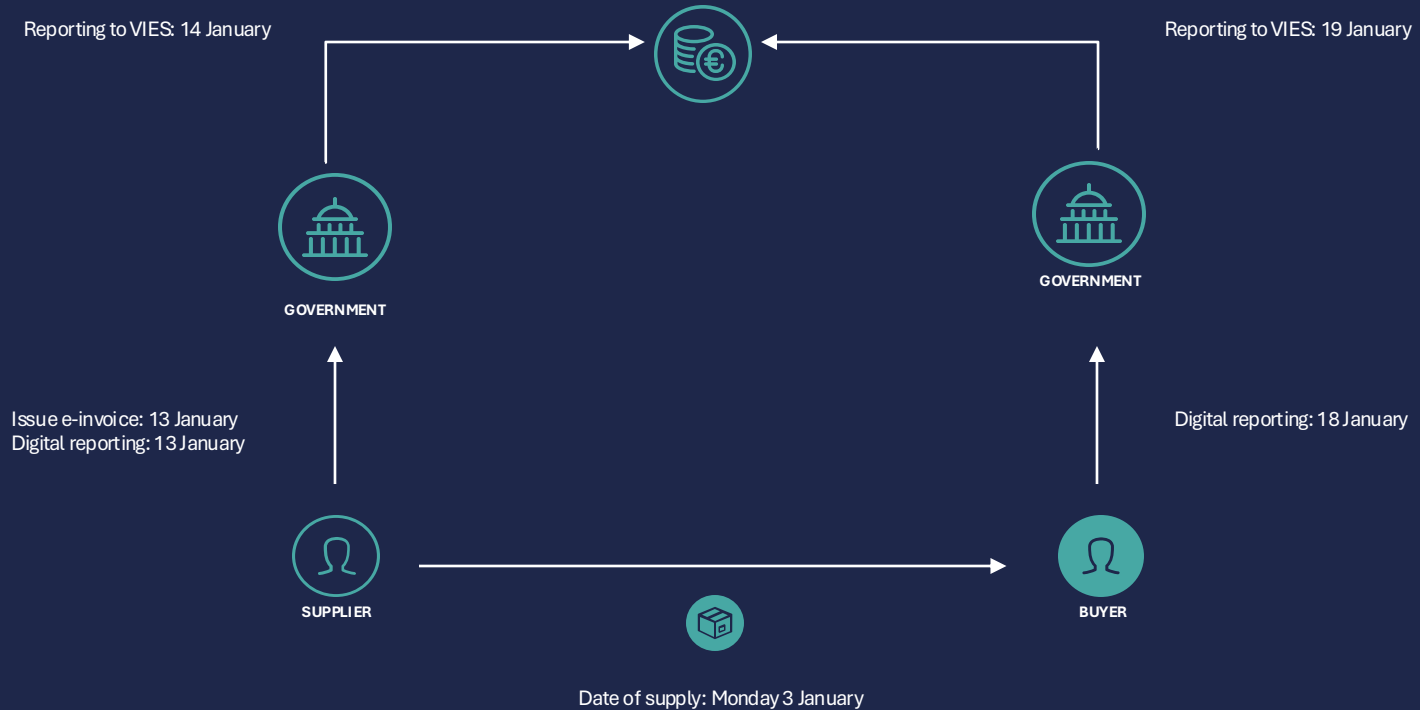

2030

2035

# Pillar I

# Pillar II

## VAT treatment of the Platform economy

- + Platforms may be made liable for collecting and remitting VAT on behalf of sellers using their services.
- + Simplified VAT compliance procedures will be introduced for platforms

2028

# Pillar III

## Single VAT registration

- + Businesses will be able to register for VAT in one member state and have that registration recognized across the entire EU
- + The IOSS will simplify VAT collection on low-value goods imported into the EU
- + The existing One-Stop Shop (OSS) scheme will be extended to cover more types of transactions and businesses

2028

# E-invoicing and e-reporting today

# Tax authorities are going digital and focus on system setup and the collection of data

## UK

- 'Making Tax Digital' (MTD)
- Digitization of tax submissions
- VAT return from April 2019

## Romania

- SAF-T- since 2022
- E-invoicing since 2024
- E-transport system in place
- B2C e-invoicing planned for 2025

## Netherlands

- Mandated audit file structure on request
- Financial GL data

## Norway

- Mandatory SAF-T reporting since January 2020

## Germany

- Mandated audit file (Go BD/GD PdU) structure upon request

## Lithuania

- SAF-T applicable (i.SAF) for VAT invoices (issued and received), also additional customs information and goods documents on demand since 2016

## Ireland

- Electronic submission of Payroll Tax Data from 2019 at time of payment

## Luxembourg

- SAF-T applicable
- OECD SAF-T based: GL, invoices, payments, customers, suppliers, tax table
- Upon request

## Mexico:

- Mandatory digital invoicing

## Italy

- Mandatory e-invoicing since 2019 (SDI)

## France

- Reduced SAF-T applicable
- Data of statutory accounting
- Upon request

## Portugal

- SAF-T applicable
- Both monthly and upon request
- B2G e-invoicing from 2019

## Spain

- Spanish SII implemented in 2017

## Chile

- Mandatory digital invoicing allowing prepopulated VAT return

## Czech Republic

- Comprehensive invoice details due with every tax return
- No e-audit

## Austria

- SAF-T applicable
- Depend on requested information
- Upon request

## Brazil

- Early adopter of e-invoicing 2008, complex system
- Disclose full invoice details before obtaining valid invoice number
- On a regular basis

## Slovenia

- Standardized file used for electronic tax data
- Used in tax audit and similar procedures
- Upon request

## South Africa

- 'IT14SD' reconciliation of return to ledgers for Income Tax, VAT, PAYE, and Customs

## Hungary

- Real-time reporting since 2021
- Online connection established between invoice invoicing software and the tax authorities' system as of 1 July 2017

## Australia

- E-audit introduced recently but upon request
- No SAF-T
- Introduction of e-invoicing based on Peppol (coordinated with New Zealand)

## New Zealand

- Promoting e-invoicing based on Peppol

## Kazakhstan

- E-invoicing mandatory since 2019

## Russia

- Comprehensive invoice details filed with VAT return
- E-invoicing, online digital cash registers, RFID tagging of high-value goods

## China

- Golden Tax system (e-fapiao) rollout in progress
- No SAF-T or e-audit

## Poland

- SAF-T applicable (JPK) since 1 July 2016
- Electronic submission of tax returns
- Several other files mandatory upon request (bank statements, warehouse info, comprehensive GL info)

## Singapore

- Simplified SAF-T: IRAS Audit File (IAF)
- Upon request

## Malaysia

- With GST repealed GST audit file (GAF) is no longer applicable
- With SST reinstated we expect GAF likely to be introduced soon

## Indonesia

- E-invoice mandatory since 2016
- No SAF-T or E-audit

# Terminology: E-invoicing <> RTR <> E-filing <> E-Audit

Real-time reporting putting pressure on finance functions:

- **Spanish SII reporting:** Electronic AP and AR invoice submission in near real-time – **every 4 days**
- **Hungary real-time upload:** Electronic submission of **all domestic AR 'B2B' invoices in real-time:** e-Invoicing to regulator

e-Filing focus on driving **automated** processing from **source** data to **filing**:

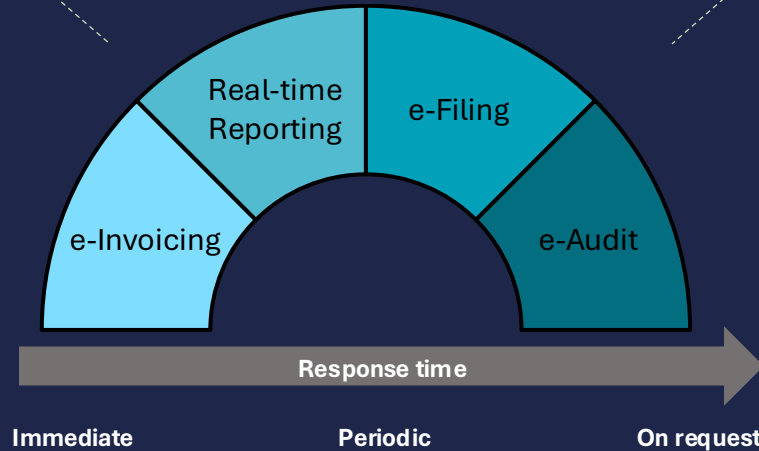

- **UK MTD:** The UK's Making Tax Digital initiative to automate the submission of VAT reporting.
- **Poland JPK:** Electronic submission of book information (warehouses, finance) on a monthly process.

Electronic transfer of **invoice data as transactions** are created and booked in accounting systems. Governments capture data as it is created:

- **Italian SDI:** Requires real-time submission of all B2B and B2C invoicing in electronic format

e-Audit focusing on **all data hosted within ERP and other systems**. Slower to respond, but more comprehensive:

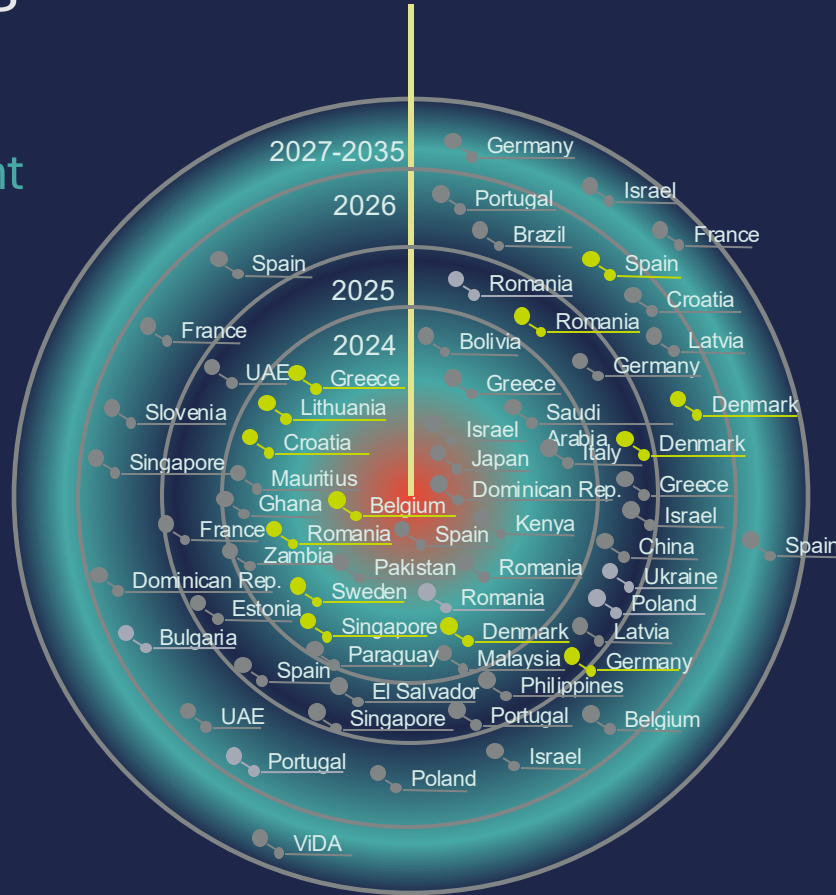

- **Norwegian SAF-T:** Require entire ERP system to be uploaded in electronic filing format. Potentially looking at entire back-up of ERP systems.

*"New reporting requirements create new types of challenges for:  
**tax calculations, electronic documents handling, tax declarations and validations and controls."***

# Digital Reporting Requirements

## Global Development

# Updates

 **Greece**  
(B2G - Extended to rest of Central Administration & QR Code)

 **Saudi Arabia**  
(phase 2, wave 6)

 **Japan**  
(B2B e-invoicing attention)

 **Italy**  
(Widened scope <25k EUR)

 **Dominican Rep.**  
(B2B- Large Taxpayers Gr 1)

 **Kenya**  
Non-VAT registered entities through eTIMS

 **Spain/Basque**  
Bizkaia (RTIR)

 **Romania**  
B2B: e-reporting

 **Bolivia**  
(B2B- Group 4)

 **Saudi Arabia**  
(phase 2, wave 7)

 **Pakistan**  
(Mandatory for FMCs)

 **Sweden**  
Dispatch Advice Projects >SEK 50 million

 **Romania**  
(e-Transport: extended scope)

 **Dominican Rep.**  
(B2B- Large Group 2)

 **Belgium**  
(B2G contracts <30k EUR)

 **Bolivia**  
(B2B- Group 5)

 **Saudi Arabia**  
(phase 2, wave 8)

 **Bolivia**  
(B2B- Group 6)

 **Mauritius**  
>RS 100 M

 **Israel**  
>25,000 NIS

 **Dominican Republic**  
(B2B- target Group 3)

 **Saudi Arabia**  
(phase 2, wave 9)

 **Lithuania**  
B2G SABS platform

 **Greece**  
B2G Remaining Contract Authorities

 **Bolivia**  
(B2B- Group 7)

 **Zambia**  
All taxpayer e-invoicing

 **Denmark**  
(Businesses w. annual report obligation using standard DBS must book digitally from next period)

 **Romania**  
B2B: e-invoicing

 **Malaysia**  
(B2B/B2G) >RM 100 M

 **Sweden**  
Dispatch Advice Machinery & transport

 **Singapore**  
Service provider recertification

 **Bolivia**  
(B2B- Group 8)

 **Paraguay**  
(end of rollout)

 **Saudi Arabia**  
(phase 2, wave 10)

 **Saudi Arabia**  
(phase 2, wave 11)

 **Saudi Arabia**  
(phase 2, wave 12)

 **Ghana**  
(e-invoicing, remaining TP)

 **Bolivia**  
(B2B- Group 9)

 **Croatia**  
(Fiscalization 2.0 for SMB)

 **Greece**  
Dispatch Advice

 **Romania** (SAP-T)

## E-invoicing

E-reporting

# Terminology: Continuous transaction controls – main models

# Terminology: E-invoice is a document in a structured electronic format

## Unstructured

Visible and readable by **people**

Invoice No: 0025      Date: July 25, 2023

Enoch Jacobs  
123-4567890  
321-76543321  
123 Street, City, US, 12345

Code	Description	Cost (\$)
123	Diagnosis	150
124	Drugs	350

Total: \$500

**PDF, Excel, Word**

Paper/E-mail PDF/Scanned

Manual process

Human readable

## Hybrid

Visible and readable by **computers & people**

Invoice No: 0025      Date: July 25, 2023

Enoch Jacobs  
123-4567890  
321-76543321  
123 Street, City, US, 12345

Code	Description	Cost (\$)
123	Diagnosis	150
124	Drugs	350
Total: \$500		

**PDF A3 with XML imbedded (eg FacturX)**

Digital

Automated invoice process and digital processing

Human readable

## Structured

Readable by **computers**

```
<?xml version="1.0"?>
<invoice number="0025" date="July 25, 2023">
  <patient firstname="Enoch" familyname="Jacobs" SSN="123456789">
    <phone type="home" number="123-4567890"/>
    <phone number="321-76543321" type="work"/>
    <address type="home" line1="123 Street" city="City" state="US"
zip="12345"/>
  </patient>
  <procedure code="123" name="Diagnosis" cost="150.00"/>
  <procedure code="124" name="Drugs" cost="350.00"/>
  <total>500</total>
</invoice>
```

**XML, CII, UBL**

Computer readable

## So – what are the key issues?

01

### **Landscape diversity**

Multiple, often divergent requirements across the globe drive the cost of global compliance.

02

### **A legal obligation**

Not a business requirement! Non-compliance can lead to severe penalties, even a halt in operations.

03

### **Processes impacted**

Impacts not just the Tax function (Record to Report), but also Source to Pay, Order to Cash as well respective business systems.

04

### **Digitalization push**

Essentially, a government mandated digital transformation requirement.

05

### **A Global topic**

Tackling country by country may lead to duplication of effort, or possibly incompatible solutions and processes.

06

### **No “one-size fits all”**

Strategic approach and the solution of best fit needs to be identified on a case-by-case basis.

*“A cross-business, cross-service topic with far-reaching legal, operational, system, and governance implications.”*

What to do next?

## Who should be involved & who owns the solution

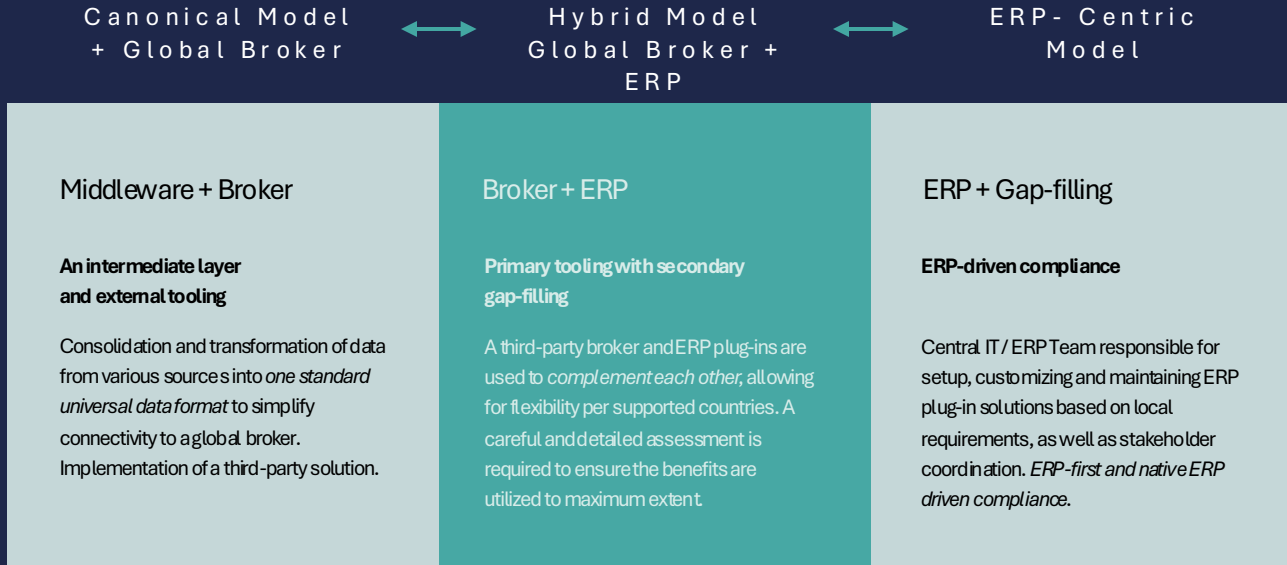

## E-invoicing

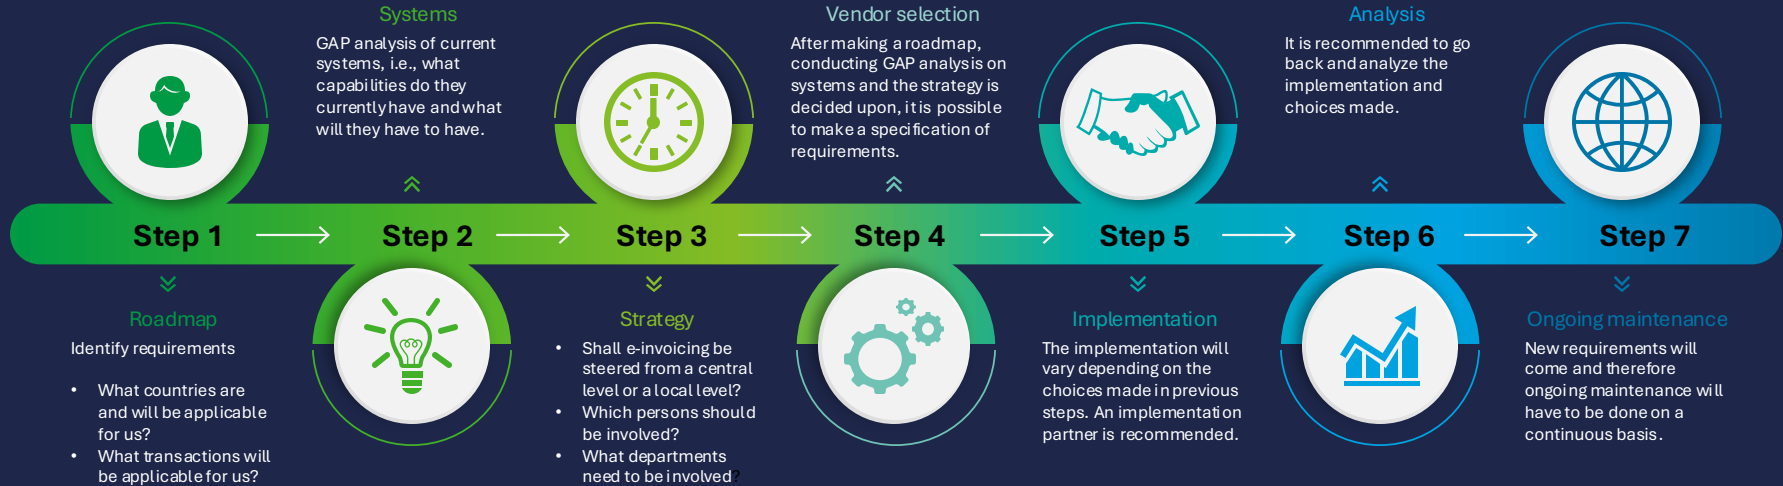

Scope of project:

- Is cross functional, impacting all types of legal entities (plant, principal, LRD, FRD, service entity, holding)
- Has consequences on Commercial, Supply Chain and General Procurement functions
- Has a strong link with external parties; and
- Is skewed towards local specs given absence of unique solution and different country requirements

# Models we see in the market (ERP perspective)

# 7 steps to a successful implementation

# Examples of initial discussions and expectation setting

# Examples of initial discussions and expectation setting

## Strategic, high-level discussions:

- + What are your **strategic considerations** about approaching the e-invoicing and digital mandates globally?
- + What is the **degree of centralization** within your enterprise, and to what extent can this be leveraged or would affect driving a centralized e-invoicing project?
- + Do you currently operate **shared service centers** and what is their role in adapting to the new mandates?
- + Are you considering a E-invoicing **Centre of Excellence** or a service center supporting the rest of the organization on the matter?
- + What does your **ERP roadmap** look like for the next 3 years?
- ...

## Solution-oriented discussions:

- + Who holds the **budget ownership** for the Digital Solution Strategy, and is it managed locally or globally?
- + What level of **country coverage** do you expect from the solution?
- + Does your organization possess adequate **local IT support** capacity to effectively implement and maintain the solution??
- + Would you like to implement **optional B2B e-invoicing** in cases where it is not mandatory but offered as an option?
- + How many **invoices** does your organization typically process on an annual basis per entity, in terms of **volume**?
- + Are there any **other services you envision in relation to the e-invoicing**, such as email distribution, digital signature, content validation, transaction reporting, etc.?
- + Are you interested in connecting with **interoperability networks** /recipients such as Peppol, Pagero, Edicom, etc.?

....

Our experience

Best practice  
we see in the  
market:

## Centralization

### 01

#### Reusability of effort

---

Centralizing knowledge and ensuring that duplications of efforts for the BAs and Group are minimized. (e.g. external support, advice, internal resources working on identifying and maintaining the knowledge on local rules and regulations & impact assessment, etc.)

### 02

#### Knowledge retention

---

Having a central team working together with local business over time ensures experiences learned and/or issues identified within all BAs can be shared in the coming roll-outs in an efficient way. This ensures insights and knowledge around e-invoicing and its impact, including implemented solutions remains centrally within the group.

### 03

#### OTP considerations

---

Large number of transactions covered by the mandates relate to intra-group invoicing. In practice, these transactions require the whole businesses to co-operate, further enhancing the positive impact of a centralized approach

# Summary

- + E-invoicing will affect the IT systems
- + There are several stakeholders in an e-invoicing project, not only Tax
- + We have to start now to ensure readiness
